[RE]DESIGN 06: GOOD AND GORGEOUS?

Can gorgeous design also be good – for you, for others and for the environment? That's the challenge addressed by the innovative products, materials and installations showcased at [re]design 06.

Bringing together 80 exciting companies, ranging from established and award winning eco-design pioneers to up-and-coming new designers, [re]design 06 is a space to play, think, learn, get inspired and make connections.

Whether they're recycling, reusing or reducing, sourcing sustainably, designing for disassembly, fair trading, inviting interaction and play, or connecting owner and object through customisation, all the designers and companies at [re]design 06 are exploring ways to make their products friendly to people and the planet.
